

Town of Slaughter Beach

Mayor Harry Ward

Credit: roadsendnaturalist

A photograph of a flooded road. The water is murky and reflects the overcast sky. A yellow double line runs down the center of the road. In the background, there are utility poles, a yellow house, and some trees. A sign on the right side of the road reads "END SPEED LIMIT 25".

Homeowner Adaptation Options **Accommodate**

Within the next 20 years, would you consider using any of these adaptation options for your own property?

Please "vote" only once per box, with the corresponding sticky dot to indicate your response.
Green = Yes Yellow = Unsure/Need more information Red = No

Elevate home and/or structures	Elevate and secure utilities	Use real time warning systems
Directing household emergency plans	Use available cooling centers during excessive heat waves	Install rain gardens to capture storm water

Other ideas (Place post-it notes here)

Homeowner Adaptation Options **Protect**

Within the next 20 years, would you consider using any of these adaptation options for your own property?

Please "vote" only once per box, with the corresponding sticky dot to indicate your response.
Green = Yes Yellow = Unsure/Need more information Red = No

Install flood gates or panels to protect doors and windows	Raise appliances above flood level or install water-proof barriers	Construct berm or floodwall around property
Practice good dune stewardship	Install home weatherization and energy efficiency updates	Other Ideas (Place post-it notes here)

Public Workshop #3 June 2017

Conclusions

- **Long term**
 - Vulnerability from Delaware Bay (east) and marsh (west)
- **Short term**
 - Public vs private
 - Road warning signs
 - 1380 AM radio, DeIDOT App
 - Changing codes
 - Tie down & secure propane tanks
 - Town emergency planning & Communicating risks to residents

Lessons Learned
